

Global diversified science company selects Zycom Technology to deploy advanced storage area network

CLIENT: Liqui-Box Canada Ltd. (subsidiary of DuPont Canada Inc. ,Whitby, Ontario)

ZYCOM CORE COMPETENCIES ON THIS PROJECT:

Network analysisProject Management

Storage Needs Assessment

Advanced Data Storage (ADS) installation and configuration

Network installation and configuration

Project Management

FEATURED TECHNOLOGY PARTNER:
HP

BACKGROUND:

Beginning with its founding in 1877, DuPont Canada is renowned for its dedication to expanding the boundaries of scientific knowledge. A commitment to innovation and exploration is at the core of DuPont's world-wide success and is evident in all aspects of the firm's activities. It's Research and Development Centre and manufacturing plant are just two examples of how DuPont grows, enables and fosters a culture of innovation throughout the firm. With vast amounts of research, operational and financial data, DuPont requires data networking and storage architectures that meet the same high standards of innovation and reliability found in all aspects of the firm's products and processes.

OUR ASSIGNMENT:

- Liqui-Box was using an older server architecture that could not accommodate the expanding needs of this vibrant company
- For Liqui-Box, one of DuPont Canada's fastest growing companies, the Financial Management System is critical to effective operations management and planning to meet customer needs
- Faster server hosts and enhanced storage capabilities were required for maximum productivity using the corporate financial management system

THE CHALLENGES:

- Storage capability and network efficiency had to be maximized in a minimum of time

OUR SOLUTION:

- **IN CONJUNCTION WITH MULTI-PLANT IT COMMITTEE**, developed a 1TB redundant Storage Area Network with high end enterprise Server
- **PROJECT MANAGE INSTALLATION**
- **ADMINISTERED 7/24 HP services contract**
